DIGITAL WORKSHOP IN PALMA

Day 2: Creating Effective Content

The second day focused on message personalization. We explored how to effectively use hashtags, keywords, and article writing techniques, and examined successful digital campaigns as case studies. Participants learned how to design and distribute digital articles to engage diverse audiences.

Day 3: Practical application

The last day was marked by practical exercises. Participants developed posts and articles tailored to promote SIGA content, and gained practical skills and insight into digital marketing tools and best practices.

This workshop not only broadened our expertise in digital marketing, but also deepened our collaboration with European partners. We will be happy to use these skills to improve the visibility and impact of our project and look forward to more opportunities for shared learning in the future!
